# Seminars

Seminars, workshops and conferences hold great importance of life of a student. They are platforms not only to learn new aspects, others perspectives and latest information, but also a good way of networking.

There are many benefits which one get from attending these first being confidence then networking, information and motivation.

As we know that confidence is very important for everyone at each stage of life, which somewhere a student (who has not taken part in any stage activity or any debate but has a good academic record) lacks as he or she did not have many opportunities to speak in front of audience. So, by attending these types of seminars and conferences and interacting with the leaders of their field or by presenting a poster in conference boosts up the confidence of a student which helps him or her during an interview.
